PennHIP Report

Referring Veterinarian: Dr Leah Webb Email: webb.643@buckeyemail.osu.edu	Clinic Name: Eastview Vet Clinic NY Clinic Address: P.O. Box 2371260 State Rt. 14A Penn Yan, NY 14527 Phone: (315) 536-9871 Fax: (315) 536-8297
-----------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------

Patient Information

Client: Frank, Kay Patient Name: Blaze Reg. Name: Scarlett's Blaze PennHIP Num: 167719 Species: Canine Date of Birth: 29 Sep 2020 Sex: Male Date of Study: 19 Jan 2022 Date of Report: 19 Jan 2022	Tattoo Num: Patient ID: 3178222AF Registration Num: DN63974108 Microchip Num: 985113004590072 Breed: GERMAN SHEPHERD Age: 16 months Weight: 96.4 lbs/43.7 kgs Date Submitted: 19 Jan 2022
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Findings

Distraction Index (DI): Right DI = 0.28, Left DI = 0.28. Osteoarthritis (OA): No radiographic evidence of OA for either hip. Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.28.
 OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.
 Distraction Index Chart:

GERMAN SHEPHERD

BREED STATISTICS: This interpretation is based on a cross-section of 17480 canine patients of the GERMAN SHEPHERD breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.24 - 0.68) for the breed. The breed average DI is 0.42 (solid square). The patient DI is the solid circle (0.28).

SUMMARY: The degree of laxity (DI = 0.28) falls within the central 90% range of DIs for the breed. This amount of hip laxity places hip at a minimal risk to develop hip OA. **No radiographic evidence of OA for either hip.**
